² Source: MSCI via FactSet. Annualized 3-year rolling returns. Past performance is not a guarantee of future results. Rolling periods represent a series of overlapping, smaller time periods within a single, longer-term time period. Value stocks are represented by the MSCI World Value Index. Growth Stocks are represented by the MSCI World Growth Index. For each period, relative performance was calculated by subtracting the annualized 3-year rolling returns of the MSCI World Growth Index from the annualized 3-year rolling returns of the MSCI World Value Index. A negative result in this calculation indicates that growth outperformed while a positive result indicates that value outperformed. Indices are unmanaged and not available for direct investment. The above returns do not represent the performance of any product or security managed by Bridgehouse and are provided for illustrative purposes only.
